Procurement Department

4. Purchase group: Smoke point and carotenoids

Number of samples: 3

| Samples of oil | | |
|--|------------------------------------|---------------------------------|
| Parameter | Preferable Technique and/or Method | Approximate number of analyses* |
| Smoke point | Visually | 3 |
| Group of carotenoids: β – carotene, lutein, zeaxanthin | HPLC | 3 |

** The Client reserves the right not to order the entire quantity (estimated approximate number of analysis), or to order more than the approximate quantity, with consideration that Client is limited by the available financial resources and that this does not significantly change the procurement contract.*

Payment is made periodically within a minimum of 30 days after performing analyzes and receiving invoice with specified analyzes and number of analyzes (from July 2021 till April 2022).

The selected bidder needs to be ready to accept the following conditions:

1. To prepare a document with an explanation and opinion for certain results of analyses, if the Client gives a request for it.
2. To deliver a detailed explanation of methods of analysis (for the purpose of result dissemination and preparing a science articles) and detailed information about used chemicals and its traceability, if the Client gives a request for it.
3. Complaint period (24 hours from receiving analytical report) in which the Client has right to request control analysis from bidder.

Criteria for the selection of the most favourable bidder:

Lowest price is the only criteria to be consider in the selection of the best bid among the bids received.
